Risk based Multi-layered Approach
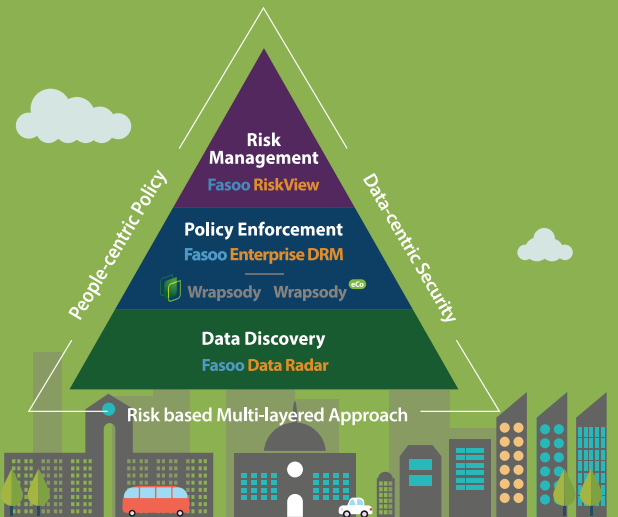

Data Security and Compliance

■ Fasoo provides the data discovery, classification and persistent security solutions demanded by today's cybersecurity regulations.

■ Over 1,200 Chief Compliance and Information Security Officers have deployed Fasoo solutions globally in the financial services, healthcare, manufacturing, and public sector industries.

General Data Protection Regulation (GDPR)

■ Companies need to be prepared for requirements of the General Data Protection Regulation that goes into effect on May 18, 2018 in the EU. The GDPR will transform the way companies protect private data. The regulation will create a single set of rules that govern the EU, put users in greater control of their personal data and enforce greater accountability and heightened enforcement.

■ Fasoo's data protection can provide the greatest level of security for companies that do business in the European Union or retain personal data of residents of the EU.

Your Data Governance Program is a dynamic initiative, addressing evolving business needs and emerging regulatory demands. Fasoo provides a foundational set of data security and compliance functions to quickly help you reach data-centric regulatory milestones. Discover your own path to compliance with Fasoo's flexible and easily scalable platform.

Fasoo's Six Step Pathway to Data Security Compliance

Define & Discover nonpublic information in files

Limit user access and control permissions

Audit files access by users, time, date, action and location

Security

Classify & Label files containing nonpublic information

Compliance

Remove access to files no longer necessary for business

Encrypt files containing nonpublic information

CISO/Data Protection Officers are in the process of aligning their Data Governance Programs to comply with all 99 Articles of the GDPR that take effect on May 25, 2018. Here's how Fasoo can help organizations comply with the GDPR:

- Fasoo data security applications address five critical articles within the GDPR

- Persistent security of unstructured data regardless of physical location

- Protection of confidential data at rest, in transit and in use

- Audit trail of access to confidential unstructured data.

- Automatically disable access to confidential data when usage period has expired

- Protection of confidential data with 3rd party processors

GDPR

The General Data Protection Regulation

Article Sections	Article Titles
6.4 (e)	Lawfulness of Processing
25. 1	Data Protection by Design and by Default
28. 3 (f)(g) 4.	Processor
32 1. (a)(b)	Security of Process
47.2 (d)(j)	Binding Corporate Rules
